

Elite Bohemia

Combining traditional glassmaking
with modern design.

CRYSTAL CHANDELIERS

Richly decorated lighting fixtures that attract the attention of the surroundings with their amazing and unmissable brilliance. This type of lighting can appeal especially to lovers of a more conservative design.

DESIGN LIGHTING FIXTURES

Original decorative lighting fixtures, which are characterized by a unique design concept and an engaging story. In their production, a combination of contemporary technologies, materials and top glass craftsmanship is used. These lighting fixtures meet all the requirements to be part of modern residences and public spaces.

BOHEMIAN CRYSTAL

Czech crystal was created in the 17th century and already in the first half of the 18th century it gained world fame thanks to its perfect optical properties. Czech crystal chandeliers decorated the palaces of personalities such as Louis XV, Maria Theresa, Empress Elizabeth and Osman III.

PRODUCTION OF THE CRYSTAL CHANDELIERS

The production of crystal lighting fixtures is a process that combines traditional craftsmanship with modern technology. It begins with the selection of high-quality crystal, which is carefully cut and polished to achieve maximum brilliance and sparkle.

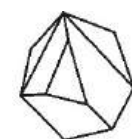

This is followed by the manual assembly of individual parts, where precision and attention to detail are paramount. Crystal elements are often complemented by metal components, which are also hand-crafted and surface-finished.

The result is a luxurious lighting fixture that not only illuminates the space but also decorates it and gives it a unique character. Each piece is an original that reflects the artistry and skill of its creators.
